PRACTICAL TOOLS FOR FIELD SERVICE

PUMPER TOOLBOX NECESSITIES

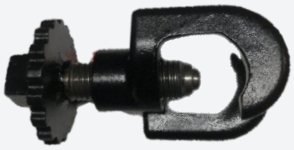

TOOLS FOR SAFER WELLHEAD MAINTENANCE

PACKING PULLER

Speeds up Superdome and cone packing replacement. Pigtail removes cone packing; threaded end engages Superdome packing and brass split rings.

THIRD HAND

Safely suspends the stuffing box cap during packing replacement, keeping the packing chamber accessible.

POLISHED ROD BULLET

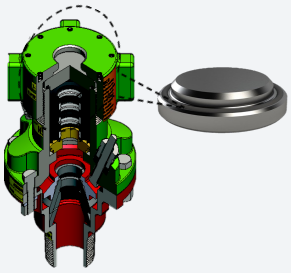

Guides the polished rod through the stuffing box and helps protect new packing and the flapper during installation.

ROD SUSPENSION TOOL

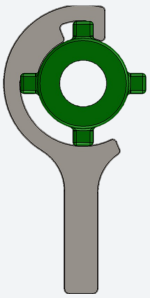

Suspends and stores rods in tubing to offset frac pressure, reducing rod removal costs and time to restart production.

NIGHT CAP / SPUD

Provides a seal to atmosphere. Uses the included modified BS cap; 2-inch NPT pressure-gauge option.

BS SPANNER WRENCH

Practical maintenance tool for wellhead service and field operations.
