REMOTE ROD ROTATOR GREASER

REMOTE GREASER

SAFER GREASING. GREATER PRODUCTIVITY.

The NEW Remote Rod Rotator Greaser allows pumpers to grease rod rotators from ground level without a harness, lift truck or production shutdown. The manifold mounts to the Samson post and routes to the rod rotator grease zerks. WSI's Polished Rod Lubricator reduces effort when lubricating stuffing box packing rubbers.

REMOTE GREASER CONNECTION

GREASE MANIFOLD

RUGGED CONSTRUCTION • EASY INSTALLATION

SAFER SERVICE
LESS DOWNTIME

REMOTE GREASER OVERVIEW

REMOTE ROD ROTATOR GREASER

SPECIFICATIONS

- Remote greasing from ground level
- Manifold mounts to pumping unit Samson post
- Grease lines route to rod rotator zerks
- No service bucket truck or safety harness required
- No shutdown required for greasing
- Easy installation
- Available with all rod rotator models
- Rugged construction

OPERATING BENEFITS

- Eliminates need for lift truck and harness
- Reduces safety risks during maintenance
- Keeps production running during greasing
- Decreases maintenance time and cost
- Improves pumper efficiency and productivity

DESIGN & SAFETY FEATURES

- Safety-focused remote greasing arrangement
- Reduces safety risks associated with rod rotator maintenance
