WELLHEAD SYSTEMS INC

THE GLOBAL WELLHEAD SYSTEMS AUTHORITY™

LOW PROFILE LUBRICATOR (LPL™)

AUTOMATIC LUBRICATION. COMPACT PROFILE.

The WSI low profile lubricator (LPL) is a compact unit that rests on top of any stuffing box. Felt pads fed by wicks from the oil pots apply clean oil to the polished rod without over-lubricating it.

3⅜" Tall

ONE-QUART OIL FILLS BOTH POTS

REPLACEABLE FELT PADS

WSI LPL™

LOW PROFILE • EASY INSTALLATION

LESS MAINTENANCE
LONGER FELT LIFE

LPL™ TECHNICAL OVERVIEW

WSI LOW PROFILE LUBRICATOR

SPECIFICATIONS

- Low profile – 3 3/8” tall
- One-quart oil fills both pots
- Half the lubricant lasts twice as long
- Permanent covers on pots prevent water and dirt contamination
- Dust seal rubber wipes dust and sand from rod on downstroke
- Secured by chain tie downs
- NEW enhanced wicking system
- Replaceable felt pads

OPERATING BENEFITS

- Increase stuffing box packing life
- Decrease maintenance time and cost
- Helps with limited stroke length
- Easy installation and access to fill pots
- Helps reduce scale buildup
- Wicks supply clean, sufficient oil without over-lubrication
- Corrosion inhibitors may be added to pots to control polished rod pitting

INSTALLATION & SERVICE

- Replaceable felt pads
- Easy installation and access to fill pots
- LPL unit rests on top of any stuffing box

LPL DESIGN FEATURES

- Self contained, entirely automatic unit
- Felt pads, oil pots and enhanced wicking system
