KB™ KEVLAR BRASS PACKING

CONE PACKING • PREMIER PACKING

KB™ CONE PACKING

- High-rated cone packing for demanding well conditions
- Suitable for steam applications
- Excellent in high water-cut applications
- Good performance in CO_2 and H_2S service
- Excellent abrasion resistance
- Temperature rating up to 500°F
- Available factory-installed in WSI stuffing boxes

PACKING APPLICATIONS

- High temperature capability: up to 500°F
- Great in steam applications
- Excellent high water-cut performance
- Developed for demanding sealing conditions

MATERIAL DEVELOPMENT

- WSI works with leading rubber manufacturers to develop and design innovative packing that will withstand the challenging well conditions.

APPLICATION GUIDANCE

- General guidelines are not the sole basis for material selection.
- Evaluate each downhole condition case by case.
